

SATURDAY, MAY 27, 1882.

The Pinal Drill, published near the Silver King mine, Pinal county, has completed its third year. It is a good paper, faithful to the interests of its section.

At last a practical test is to be made of the Colorado bottom lands. That enterprising capitalist, Mr. Thos. Blythe, has sent down a lot of material and a number of hands, to start a sugar plantation, on a large scale, at or near Lerdo. The place will be in charge of Mr. M. Kinley, an experienced sugar planter, and, having ample means at his command, we predict a brilliant success. Yuma will yet be the New Orleans of the Colorado valley.

Our Silver district correspondent tells us that the miners in that region are complaining of the irregularity of the steamers, and the inconveniences to which they are put by the non-arrival of freight. We can assure them it is no fault of the company's, but it is as eloquent an argument as could be given in favor of the appropriation for the improvement of the Colorado river. If half the money would be put to economical use upon this river that was used to display our imbecile navy, at Fortress Monroe, such annoying inconveniences would be done away with.

One would naturally suppose, from the tone of the Star, of Tucson, and the Tombstone Epitaph, that there were issues at stake in the coming campaign involving the life and property of half the territory. So far we have been able to see in the Star only a desire to see the democracy triumphant, simply because the Star people are democratic. The Epitaph soars to a higher and broader plane of journalism, and endeavors to make political capital out of a Presidential proclamation and the conduct of the Earps, to further the election of its candidate for Sheriff of Cochise county. How any mortal man can see the logic or consistency in such a policy, is more than we can understand. Yet a brain that is incapable of seeing the propriety of sending the Sheriff of Pima county for prisoners arrested for crimes committed in that county, would be apt, we think, to hold the republican party responsible for the unofficial act of one member of that party.

An Inquiry.

EDITOR SENTINEL:—I write to you for information in regard to Territorial "paper." All the bonds and warrants issued by this Territory sell at a premium, excepting Territorial prison scrip. This class of warrants is drawn on the General Fund, and draws ten per cent. interest. And I want to know "by the great Cæsar" why prison scrip is worth only 90 cents, while all other paper, of the same nature, sells at par, and often above? To a "man up a tree" it looks unjust and unreasonable. By giving this your attention you will oblige

QUIEN SABLE.

In all of the Territorial bonds, excepting the "Prison bonds," the time is specified at which they will mature and become payable. As they run for a long time, and bear a good rate of interest, they command a good price. On the other hand, the Prison bonds are drawn on the General Fund, are payable at no specified time, unless there is money in this Fund; then they are payable on demand. This is the only reason we see why the Prison bonds are not considered as desirable as other Territorial paper. There should, however, not be this difference in the market value of the bonds, for these in question bear a high rate of interest, and are considered by financiers as good negotiable paper.

SILVER DISTRICT.

Our Weekly Letter from our Regular Correspondent, with the latest information.

THE WONDERFUL REMNANT.

Eighteen Feet of Ore in the Remnant Mine. Ore in the Silver Glance, Flora, and others.

EDITOR SENTINEL:—

Look round the habitable world, how few know their own good, or, knowing it, pursue.

This quotation is peculiarly applicable to those who are afflicted with a plethora of shackles, when ignorant of their own good, they place not a moiety of their winnings where they will do the most good, both to themselves and to those who are willing to exchange promising mining prospects for legal tender collateral. The effect in this district of massive ledges would be that we—the Silver District—would be able to more thoroughly develop that which we may have remaining;—which precludes condensed means: investigate, invest and the money paid out will be of double interest to the district, to the investor and to the investor. Investigation we can stand, and invite.

THE BLACK ROCK.

Superintendent F. J. Clark has been absent from the district, on a tour of inspection of mining property in Colorado. Mr. Clark is gaining an enviable reputation as a careful and honest expert in mining matters, and his investment in the now well known and valuable Black Rock group of mines, is proof conclusive of his penetrating forethought—this mine being about on a paying basis, and contract being let for hauling ore to river for reduction.

THE REMNANT.

This remarkable property, with 18 feet of solid pay ore at the 165 foot level, vertical shaft, is sending to the surface regularly the sand carbonates, chloridized galena ore, the "pure truck," and plenty of it. The hoisting power will consist of double engines, and owing to not having been able to ship by May steamer, will delay shipment until Fall. Tom Downey, that perpendicular white man, has returned, and is now on the ground. The Gilchrist store and saloon, run in connection with the mine, is non est.

THE LOST MINE.

Work continues without cessation on this property. The cross cut will be pushed until actual width of ledge is ascertained, and what addition will be made to the 72 feet in width now in sight. An ore car will be put on by arrival of next steamer, and upon completion of cross cut, continue sinking. The result of development can not be given, as the property will be worked by the present owners for what is known to be in it. This is the best ventilated mine in the district, and has employed the most skillful miners, paying at the rate of \$4.00 per day, the highest wages in camp.

THE SILVER GLANCE.

Contract of 50 feet cross cut from 235 foot level, to east, is being pushed by Pickenback, and every indication favorable to development, opening one of the leading mines of the district. Professor Siebeck is giving the contract his personal supervision.

THE MEDORA.

Continues to be developed, and improves constantly, as depth is acquired. The Off-spring is being driven towards shades from the 48 foot shaft, and a regular camp established on the grounds.

A-SAYER WETMORE.

Prof. E. L. Wetmore, of Tucson, having made a number of assays during the past three years for the writer, he feels justified in recommending the gentleman to his brother miners as a careful and reliable assayer. His terms are peculiarly gratifying to the

generally financially hard pressed miner.

RIFLES.

If at any time the reader or his friends should be struck by a rattlesnake, as quickly as possible cover the wound with baking powder, and renew every 20 minutes. It will be found a certain remedy. The baking powder soon becomes matted with a greenish fluid. It is the surest remedy known outside of whisky straight.

JAS. P. LEH,

Who has just completed his contract on the Lost mine, has purchased the Hodges building, and will open a first-class club room, where the tonsils of the desecrated miner will be duly oriented with the best of liquid explanations. Jim is a good fellow, and for him an excellent arrangement.

Is going up to the district against the silver arrangement, because he is receiving freight on his property, and it really is a nuisance, now, his freight teams are off to receive the ore, but only the live steamers are affected. To relieve the pressure somewhat the Douglas freight will again be put on the road.

The East Silver district wagon road is complete and is the best roadway in the district, and permanent withal. On the Silver Tube flat the road branches, extending south and east to the Lost mine, and northwest to the Bobtail and Bull Dog ground.

BRONCO.

KLARA CAMP, May, 21st, 1882.

Prescott is happy. She is at last assured that the Governor is going to live in that town possibly permanently. Our authority is the following, from the Courier:

"Hon. F. A. Tritt, Governor of this Territory, is expected to arrive here to-day from the East and cow boy section of the Territory. He comes to stay, and will soon be joined by his family. Welcome, Governor."

The permanent military force stationed in the Territory hereafter, is to be two regiments of infantry and one of cavalry. This is from the Secretary of War. It has not been announced what the numbers are of the regiment which will be stationed here.—Democrat.

The steamer Mohave did not get off on Friday morning, as was stated. She got as far as the first sand bar, where she stuck, remaining in sight of town until afternoon, much to the disgust of those passengers who had gone through the fearful formality of adieu. By transferring part of her freight to a barge she was enabled to get away on Saturday. She took additional freight as follows: Castle Dome, 34,411 lbs.; Piencho, 335; Nortoc's Landing, 40,111; Roads, 890; Swallow Nest Bend, 747; Ehrenberg, 6,945; total, 83,439; grand total, 143 tons.

Judge Silent, formerly of the Supreme bench of this Territory, passed through Yuma on Thursday evening, on his way into the Territory.

Mr. Jas. McFarlane has taken the position of clerk at the hotel.

The Results of Necessity.

What the ancients suffered for the want of knowledge in medical science, can only be appreciated by contrasting the vast amount of suffering cured and pain alleviated in modern times, by the use of Swayne's Ointment for skin diseases. Its introduction was characterized by the necessary withdrawal of a score or more of illusive, quick nostrums, whose evil effects have left living monuments to denounce them. Thus is exemplified the proverb, Necessity is the mother of invention.

Go to Scott's and take a chance in the grand raffle for that fine guitar.

MARRIED.

HANNA—HANNA—In Los Angeles, on Monday, May 22d, 1882, May Hanna, of Fairbury, Ill., and Chas. B. Hanna, of Los Angeles.

The knowing ones have expected a move of this kind from Charley for some time, but to the untold his conduct was a mystery. They now see what was "the matter with Hanna."

NEW TO-DAY.

WATER JACKET SMELTING FURNACES

Galena-Silver and Copper Ores.

THE PACIFIC WATER JACKET Smelters embrace many features that are entirely new and of great practical utility, which are covered by letters patent.

No other furnaces can compare with these for durability, and in capacity for uninterrupted work.

MORE THAN SIXTY

Of them are now running on the Pacific Coast, giving results never before obtained as regards continuous running, economy of fuel, grade and quality of metal produced. We are prepared to demonstrate by facts the claims here made. These Smelters are shipped in a complete state, requiring no brick or stone work, except that for the crucibles, thus saving great expense and of time in construction.

Complete smelting plants made to order of any capacity, and with all the improvements that experience has suggested as valuable in this class of machinery. Skilled and experienced smelters furnished when desired to construct and to superintend construction and running of furnaces. Estimates given upon application. SEND FOR CIRCULAR.

ASSAYING.

Gold and silver assays.....\$1.50
Copper.....1.50
Lead.....1.50
Ten assays of gold and silver or lead or copper for ten dollars. Sampled of ores and money may be forwarded by mail or express, and will be promptly attended to. Shippers will please label the different samples, and state what they wish them assayed for. Address, E. L. WETMORE, Assayer, Tucson, my 13-11

ARTICELL PIANO ORGAN

10,000 Pianos, 1,500 Organs, Save Half Price of Manufacture. From \$10.00 to \$100.00. Cash, Rent, Installments, Catalogue Free. ARTICELL, Market & Powell Sts. San Francisco.

This Great Strengthening Remedy, and NERVE TONIC, is the result of over 30 years of practical experience, and CURES WITH UNFAILING CERTAINTY Nervous and Physical Debility, Seminal Weakness, Spontaneous Emissions, Impotency, Exhausted Vitality, Premature Decline and Loss of Manhood, from whatever cause produced. It enriches and purifies the Blood, strengthens the Nerves, Brain, Muscles, Digestion, Reproductive Organs and Physical and Mental Faculties. It stops any unnatural debilitating drain upon the system, preventing involuntary losses, debilitating dreams, seminal losses with the urine, etc., so destructive to mind and body. It is a sure eliminator of all KIDNEY AND BLADDER COMPLAINTS. It contains no injurious ingredients. To those suffering from the evil effects of youthful indiscretions or excesses, see a speedy, permanent and thorough cure, is GUARANTEED. Price, \$2.50 per bottle, or five bottles in case, with full directions and advice, \$10.00. Sent secure from observation to any address upon receipt of price, or C. O. D. To be had only of

DR. C. D. SALLFIELD, 215 Kearny street, San Francisco, Cal. Consultations strictly confidential, by letter or at office, FREE. For the convenience of patients, and in order to insure perfect secrecy, I have adopted a private address under which all packages are forwarded.

TRIAL BOTTLE FREE.—NOTICE!—I will send a trial bottle of the RENOVATOR—sufficient to show its merits—free of charge, to anyone afflicted, and suffering by letter, stating his symptoms and age. Communications are all strictly confidential. my 13-11
